Student Planner Website

An Interactive Prototype Applying HCI Principles
BIT2073 Human Computer Interaction

Group Members:

Name	ID

Agenda / Outline

What We'll Cover Today:

1. Application Concept
2. Target Users
3. User Storyboard
4. Comparison with Google Calendar
5. Interactive Prototype (Screens)
6. HCI Principles Applied
7. Conclusion

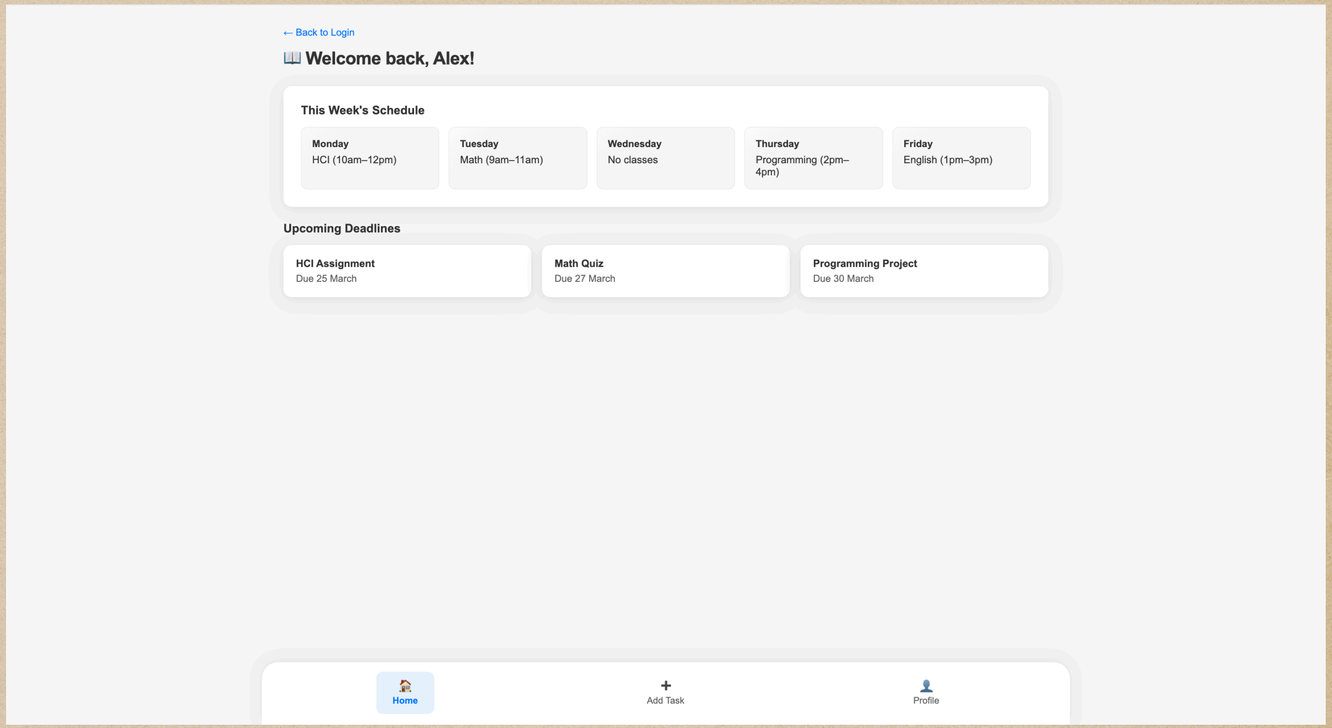
Application Concept

Background & Justification

- Students juggle multiple courses, assignments, and deadlines
- Paper planners and generic apps don't combine schedule + tasks + preferences in one place

Main Objectives:

- View weekly schedule at a glance
- See upcoming deadlines immediately
- Add tasks with title, course, due date, priority, notes
- Customize settings (dark mode, email reminders)



Target Users

Who Will Use This?

Primary Users	Secondary Users
University students	High school students
Full-time & part-time	Anyone with course schedules
Have multiple modules, assignments, exams	Need deadline tracking

Problems They Face → How We Solve

Problem	Solution in Our App
Forgetting due dates	Upcoming Deadlines section on Dashboard
Losing track of classes	This Week's Schedule (Mon–Fri)
Scattered notes	Add Task form with notes field
Need one place for everything	Dashboard + Add Task + Profile

User Storyboard

User Scenario: "Alex Adds a New Assignment
Flow:

1. Login → 2. View Dashboard → 3. Tap Add Task → 4. Fill form → 5. Submit → 6. Back to Dashboard

Interactive Prototype – Tools & Screens

Built With:

- HTML & CSS (static prototype)
- Mobile-friendly layout
- Bottom navigation

Screen	Purpose
Login	Email + password entry
Dashboard	Weekly schedule + deadlines
Add Task	Form to create new tasks
Profile	Settings + logout

Interactive Elements & Workflows

Interactive Elements:

- Buttons (Login, Add Task, Logout, Cancel)
- Forms (email, password, task fields)
- Radio buttons (priority)
- Checkbox (email reminders)
- Bottom navigation (Home, Add, Profile)

Consistency in Design

✅ Layout:

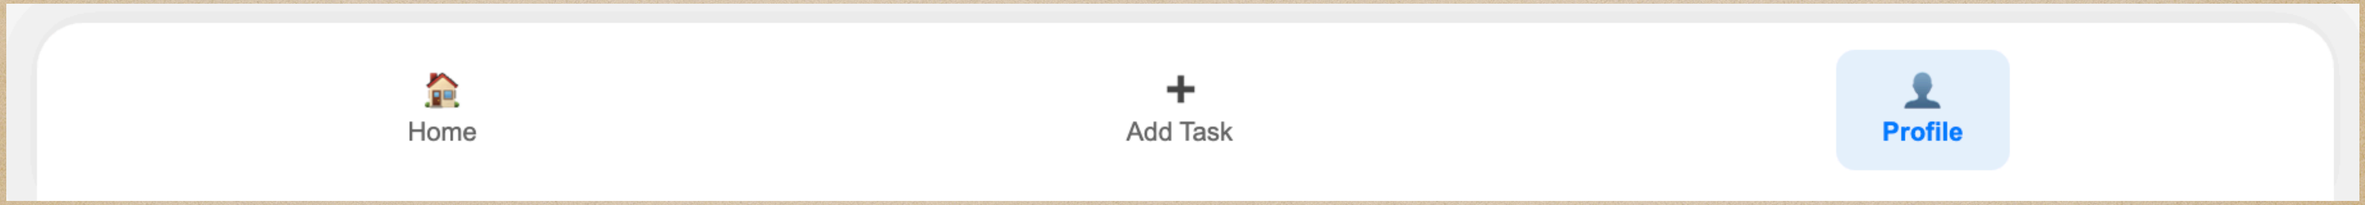
- Same bottom nav on all pages
- Same "Back to Login" placement
- Consistent card style (white, rounded corners, shadow)

✅ Typography:

- Arial font throughout
- Clear hierarchy: titles → section headers → body

✅ Colors & Navigation:

- Blue buttons, light gray background
- Bottom nav: 🏠 Home | ➕ Add | 👤 Profile
- Active state shows which screen you're on



HCI Principles Applied

Principle	How We Applied It
Fitts' Law	Large buttons, well-spaced
Consistency	Same fonts, colors, nav on all pages
Feedback	Button hover states, active nav highlight
Affordance	Buttons look clickable (color, shadow)
Error Prevention	Date picker, Cancel option
Accessibility	High contrast, touch-friendly targets

Conclusion & Thank You

The Student Planner Website shows how HCI principles can be applied to solve a real student problem. With a focus on usability, consistency, and user needs, even a simple prototype can make a big difference.

🙏 Thank You!
